

Pharmacies Launch Allergy Screening, Allergy Testing & Bio-Life Allergy Preventatives

Bio-Life are proud to announce that as of May 2010, they are National Pharmacy Association accredited suppliers which means that allergy sufferers can now get PetalCleanse/C™, PetalCleanse/D™, AirCleanse™, HomeCleanse™ and FabriCleanse™ from over 97% of all the pharmacies and chemists in the UK.

Furthermore, Pharmacists will offer routine allergy screening and testing services to help patients discover the source of their rhinitis, wheezing, sneezing, asthma, eczema and hives. Food intolerance testing will also be available. Up to now, only a minority have been able to access affordable testing because of the lack of allergy specialists in the NHS and the conflicting demands placed on GP's surgeries. The initiative comes from the NPA and Allergy UK after years of campaigning to improve patient care.

Pharmacists are attending NPA and Allergy UK training courses to ensure that they have the latest scientific information at their fingertips. Most pharmacies have opted to nominate an "Allergy Specialist" to run their in-store consulting rooms. Talks by Bio-Life's Mary Lloyd will form part of the agenda so that the specialist have detailed knowledge of the Bio-Life product range and its application.

For further information, contact the National Pharmacy Association on 01727 800401 or EMAIL sales.dept@npa.co.uk or call the ***Bio-Life Allergy Helpline on 01608 686626***, open 8 am to 8 pm, 7 days per week.
